

Bay Area Council Economic Institute

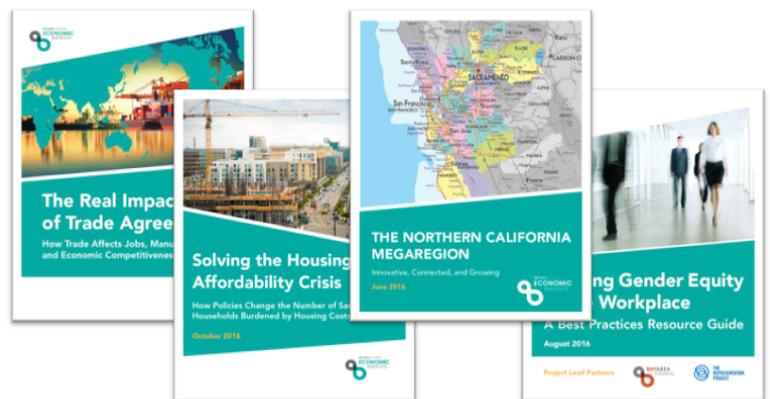

The Economic Institute is the leading think tank focused on the most critical economic and policy issues facing the nine-county Bay Area region.

ABOUT THE BAY AREA COUNCIL ECONOMIC INSTITUTE

Since 1990, the Bay Area Council Economic Institute has been a valued forum for stakeholder engagement and a respected source of information and fact-based analysis on economic and policy issues facing the San Francisco/Silicon Valley Bay Area, the Institute is a trusted partner and adviser to both business leaders and government officials. Through its economic and policy research and its many partnerships, the Institute addresses major factors impacting the competitiveness, economic development and quality of life of the region and the state, including infrastructure, globalization, science and technology, and health policy.

The Economic Institute is guided by a Board of Advisors drawn from influential leaders in the corporate, academic, non-profit, and government sectors. The Institute is housed at and supported by the Bay Area Council, a public policy organization that includes hundreds of the region's largest employers and is committed to keeping the Bay Area the world's most competitive economy and best place to live.

The Bay Area Council Economic Institute provides a shared platform for leaders to act on key issues affecting the regional economy. It accomplishes this by producing focused analyses on key issues affecting the Bay Area and its future, and by mobilizing regional and state leaders to address those issues, based on working partnerships and a strong foundation of economic and policy analysis.

Bay Area Council Economic Institute

The Economic Institute is the leading think tank focused on the most critical economic and policy issues facing the nine-county Bay Area region.

For over 25 years, the Economic Institute has engaged in a wide range variety of research, convening, and consulting activities to support progress on the most pressing issues facing the San Francisco Bay Area and California. These range from short policy memos to in-depth reports informed by original economic and policy analysis and the surveying and convening of key business and civic leaders. The following list highlights the types of analysis the Institute performs with recent examples.
